BOGOTÁ

URBAN **SUSTAINABILITY** - MOBILITY AND **PUBLIC SPACE**

BOGOTÁ

Location and General Facts

Colombian Flag

Colombia is located in the North part of South America and it has an estimated population of **48,786,100 inhabitants**.

It shares borders with **Venezuela, Ecuador, Perú, Brasil, Panamá** and the **Caribbean Sea** at the north.

It's capital city is **Bogotá D.C.** which is located in the central part of the country, in the middle of Andes Mountains, **2600 meters above the sea level**.

Petroleum is Colombia's main export (45%), followed by Coffee, Coal, Nickel, Emeralds and others.

Inhabitants: 8,9 million

Density: 17,768 inhabitants / Km²

Colombia's Main Cities

BOGOTÁ D.C. - 8,9 million inhabitants

MEDELLÍN - 2,4 million inhabitants

SANTIAGO DE CALI - 2,3 million inhabitants

BARRANQUILLA - 2,3 million inhabitants

**What has happened in Bogotá
in the last 20 years???**

- Change in the political culture.
- Better Financial Management.
- Integration of different fields of knowledge regarding city management.
- Recovery and renewal of the different public spaces.
- Investment in transport infrastructure and mobility strategies.

URBAN TRANSFORMATION

A tall, square clock tower stands in a park. The tower is light-colored and has a clock face on its upper section. It is surrounded by greenery, including trees and a manicured hedge. In the background, there are large, forested mountains under a clear sky. The foreground shows a paved plaza with a bench and some low-lying plants.

Mobility overview

How we have expanded?...

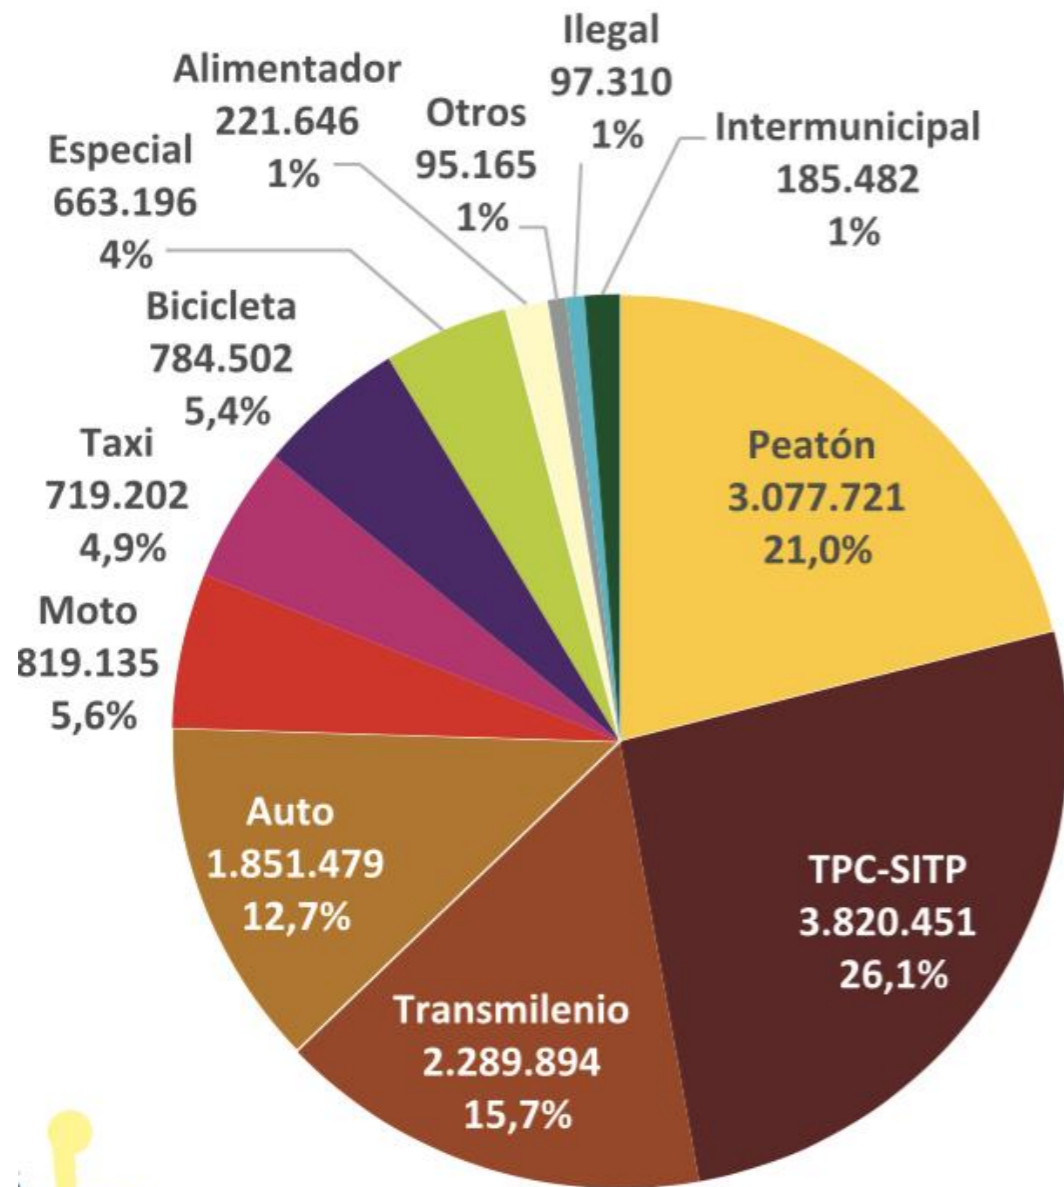

How we move?...

Mobility overview

How we move?...

Modal split in 2015

26,4%

Growing population of cyclists (half million trips per day),

47,7%

more than 6 million trips in public transit,

18,3%

18% use of individual motorized modes,

1,5 million cars,
400.000 motorcycles

We had established our priorities...

Priority pyramid for transport projects

Source: Urban development institute. 2014.

We had used tools: TOD Standards

The Sustainable Transport Oriented Development is an urban tool for planning and designing around the public transit that builds compact urban cells, high density and allows people to enjoy mixed uses, services, public space for the social integration.

We are committed to maintain the use of sustainable modes

Economically
Affordable

Politically
feasible

Socially
Inclusive

Caring about
next generations

And we translated it into a public policy..

We have a mass system environmental friendly...

2'354.568 tons less of CO₂eq
(carbonic gas),
verify by *Kyoto's Protocol*

Saving **584.952** barrels of oil
per year

Income for carbon bonus up
to around **5 million dollars**

*Mobile sources produces around 1.100 tons per year of PM
(Particulate Matter)*

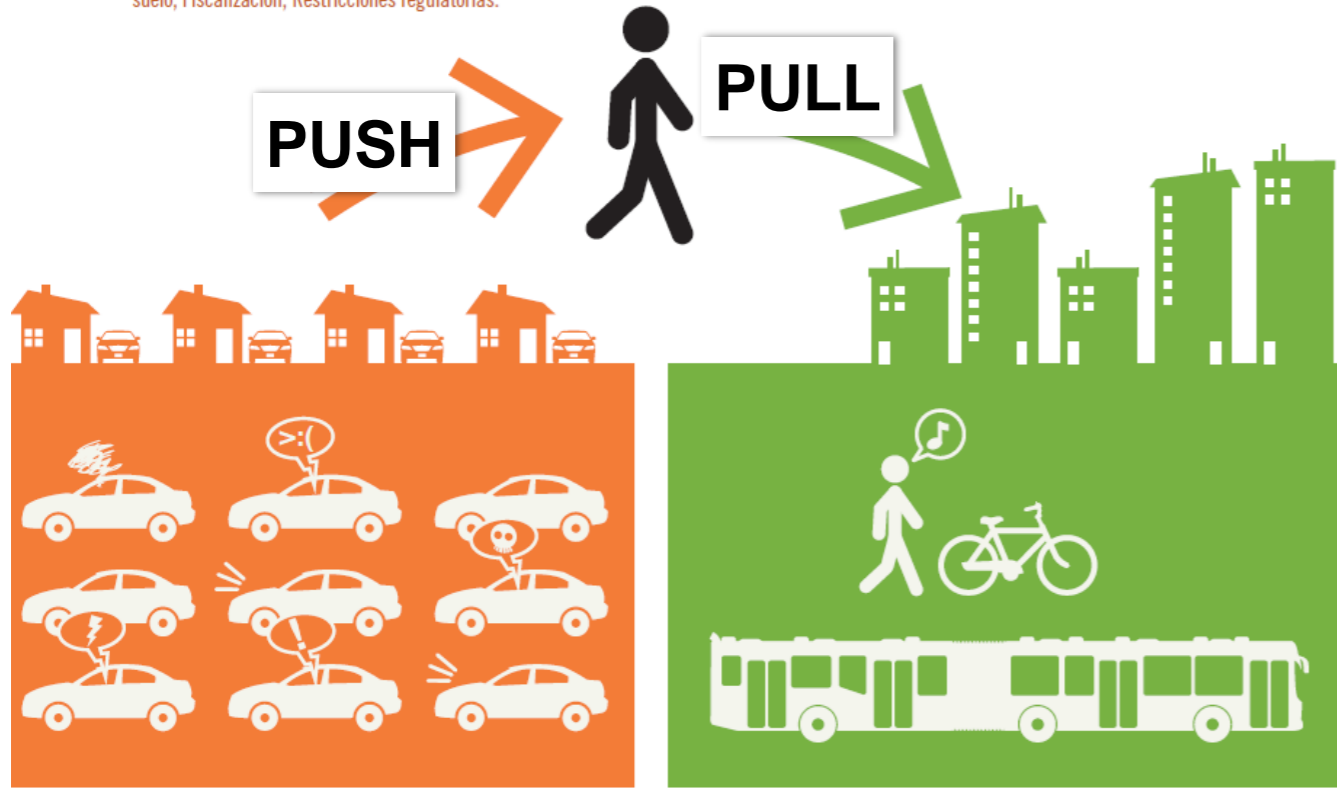

We established rules and regulations for private car management

Medidas para alejar:

Precios de combustibles, Cobros por propiedad, Cobros por congestión, Gestión de estacionamientos, Reducir la movilidad y velocidad del automóvil, Planificación integrada de usos del suelo, Fiscalización, Restricciones regulatorias.

Medidas para atraer:

Mejorar transporte público, Infraestructura para bicicletas y peatones, Sensibilización ciudadana, Ampliar opciones de movilidad, Desarrollo urbano compacto.

Medidas para alejar y atraer:

Redistribución de perfiles viales integrales con espacios para peatones, ciclistas y autobuses, Reorganización de los tiempos en los cruces semaforizados para favorecer al transporte no motorizado, Participación ciudadana y mercadeo

Park regulation

Plate restriction

Now we move different...

Before

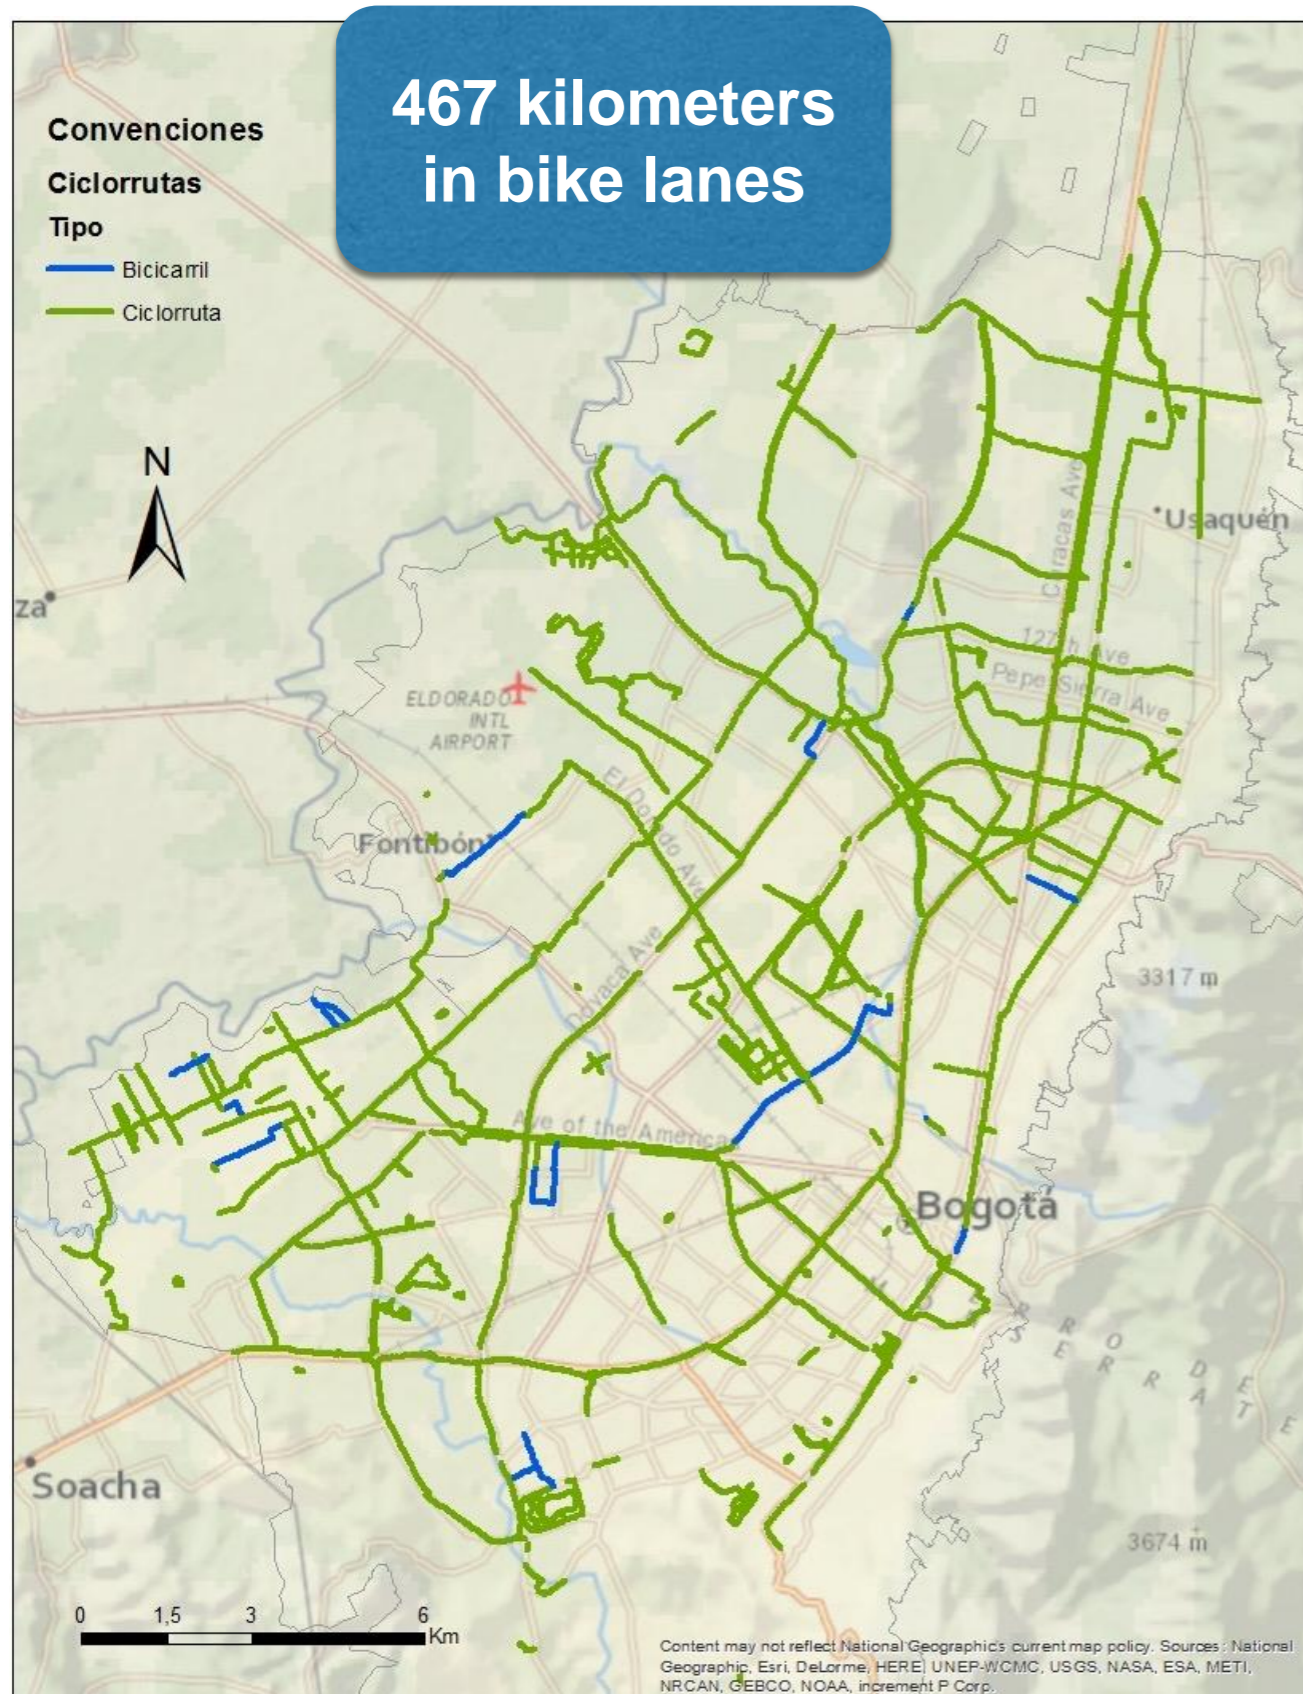

Now

Since 1998 Bogotá is providing exclusive lanes for cyclists, nowadays the city has more than 400 kilometers. Every new road projects (BRT, mass rapid transit, highways) must include this special infrastructure.

Now we move different

10 Lessons from Bogotá

1. Integration: BRT is a cheaper solution to solve transport needs, but is not the only one.

2. Sustainable modes: Invest more to facilitate walking and cycling.

3. Management of private modes: Make car use as inconvenient and expensive as possible.

4. Save lives: Road safety must be an important goal- Vision Zero.

5. Go green: Adopt green technology but do not engage with any in particular.

6. Citizens engagement: Empower the local community and make them part of the public decisions.

7. Less is more: Small interventions in public spaces sometimes generate big changes.

8. One shared view will save money: One shared view from public and private sectors to continue development plans through different administration.

9. Data matters: Create an open data policy in order to transform it into information and put it into the service of the society.

10. Get out of your seats go out to the street.

**THE HEROES IN COLOMBIA ARE USED
TO PEDAL**

**GET OFF OF THE CAR AND TAKE A
BIKE**

Thank you!
